(54) OPTICAL DISK REPRODUCING DEVICE, OPTICAL DISK RECORDING METHOD AND OPTICAL DISK TO BE USED THEREFOR

(57)Abstract:

PURPOSE: To make it possible to read out a moving picture from a prescribed position by previously recording address data to be reproduced as a chapter in a moving picture user file regulated by a motion picture export group standard and reading out the recorded data to reproduce the chapter.

CONSTITUTION: A main controller 21 receiving a reproducing command from a commander 32 or an operation part 33 applies a prescribed command to an auto-changer controller 20 to set up a prescribed video CD on a CD player 19 and start reproducing. Reproduced data are applied to a CD-ROM decoder 22 and a reproducing start status signal is applied to the controller 21 so as to allow a video CD reproducing controller 24 to start the decoding of CD data. The decoder 22 decodes the applied data to the data of each byte corresponding to a CD-ROM format and writes the decoded data in a RAM 23 and a controller 24

separates the written data into audio and video data, which are respectively supplied to a video decoder 25 and an audio decoder 26.
